01

THE MARK

**Two strands.
One molecule.**

The mark abstracts a peptide helix into a dotted Y —

The mark abstracts a peptide helix into a dotted X two intertwining amino-acid chains crossing at the center. One strand in Navy, one in Signal Blue. The dot weight swells at the crossing point, creating a natural focal center that reads as both scientific and confident.

- Strand A – Navy • #0E1B2E
- Strand B – Signal Blue • oklch(0.55 0.18 255)

CLEAR SPACE RULE

Always maintain a clear zone equal to the full height of the dotted-X mark on all four sides. No other graphic elements — text, imagery, borders — may enter this zone.

PRIMARY – LIGHT

NeXGen
BioResearch

Default use on light backgrounds.
Stacked Ne[X]Gen / BioResearch.

PRIMARY – DARK

NeXGen
BioResearch

Use on dark / navy backgrounds.
Accent brightens to maintain contrast.

HORIZONTAL COMPACT

NexGen
BioResearch

Web headers, email signatures.
Mark ← divider → wordmark.

MARK ONLY

App icons, favicons, badges.
Minimum: 32px height.

30%

60%

100%

Dark

Deeper

Signal Blue tints are used for hover states, focus rings, alert backgrounds, and data visualization. Always maintain a minimum 4.5:1 contrast ratio for accessible text.

Aa

Bricolage Grotesque

PRIMARY • VARIABLE FONT • opsz 12-96

Optically-sized grotesque with warmth and authority.

Works across display sizes and small UI labels.
